MEMORANDUM FOR: Assistant for Technical Development, NPIC

SUBJECT: Modification of [redacted] Split Vertical Light Table

25X1

1. The Photographic Analysis Group evaluated the [redacted] Split Vertical Light Table during the week of 20 November 1966. PAG concurs in the concept of the table, but we found that the design of the loop forming mechanism would not accommodate the small loop required by some of the KH-7 [redacted] photography. We have no interest in the vacuum system nor in the measuring devices.

25X1

25X1

2. It is requested that one [redacted] Split Vertical Light Table be purchased, less the vacuum system and the measuring devices, and that the following modifications be made as expeditiously as possible:

25X1

A. Modify the loop forming device to allow loop length to be varied from 0" to 120".

B. Modify the microscope mount to provide a more positive control of height adjustment and focus of the microscope.

25X1

3. The [redacted] Split Vertical Light Table, if successfully modified, should provide at an early date a light table that can be used for all KH photography. This table is considered as an interim capability to be used until the Dual Viewing Light Table is developed and ready for procurement. The Development Objectives for the Dual Viewing Light Table should not be affected by this request. In fact, certain design features from the modified [redacted] table may be directly applicable to the Dual Viewing Light Table.
